

Planting From Seeds

Posted on *January 01, 1970* by *Alexandre DUBOS*

25 November 2015: We have been learning how most fruits and vegetables grow from seeds. The children now understand (more or less!) that plants need water, light, air, and soil (and sometimes other damp materials) to grow. We were able to plant our seeds to grow our very own bean sprouts, thanks to the help of our handy parent helpers. Look at what we have now...

Day 1

Day 2: our humble seeds starting to germinate...

Day 4: look at our sprouts starting to grow!

Watch this page for more news on our bean sprouts development!
